Stone Benches & Tables - Special Cuts

- Offering Premium Natural Stone & More -

Flagstone: Flagstone is a generic name for flat slabs of paving stone, usually sandstone, limestone, or slate, which split easily. It may have irregular edges or be cut into squares and rectangles. Most often, it is used for pool decks, patios, driveways and as backyard stepping stone.

Cut Stone: Our cut stone integrates traditional cut stone with modern sawing and cutting techniques, but without jeopardizing the integrity of craftsmanship. These products meet the demands of builders and architects for uniformity of material in specific applications.

Moss Rock & Boulders: Decorative native boulders. For exceptional accent and scale, these selections are ideal.

Stone Benches & Tables - Special Cuts: Flagstone cuts can be made in various sizes and shapes for benches, mantles, hearths, cap rocks, pool and patio flooring as well as general construction applications.

www.WhiteMountainBrand.com

Gravel & Accents: White Mountain offers a variety of aggregates, decorative stones, builder's stone and specialty products to serve most any need. Much of our production is geared toward product recycling and quarrying of gravel for a wide range of uses. We have been in aggregate production for several years, recently adding bagged gravel products.

Saw Cuts: Saw cuts can be ordered for many of your construction needs. Most common are stone flooring or wall veneer. These cuts can be applied to pre-graded stone from 1-2 inches in thickness. Special orders can be cut to your specifications.

Retaining Wall Stone: Large stone profile for retaining wall applications "speak volumes" for your special project.

"Quarry Direct": Our clients all get the benefits of our "quarry direct" low pricing and fast delivery.
